DETAILED ACTION

Election/Restrictions

1. Claims 10-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on February 7, 2006.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 8-9 are objected to because they improperly include characters within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same

element or group of elements in the claims should only be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are drawn to an abstract idea and/or mental process.

MPEP § 2106 provides:

If the "acts" of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter. *Schrader*, 22 F.3d at 294-95, 30 USPQ2d at 1458-59. Thus, a process consisting solely of mathematical operations, i.e., converting one set of numbers into another set of numbers, does not manipulate appropriate subject matter and thus cannot constitute a statutory process.

In this case, claim 1 recites (in part) "comparing the first and the second stability ratios." See also claim 4-5 & 9 (claiming similar limitations). These are at best only mathematical processes and thus cannot constitute a statutory process.

Claim Construction

6. Applicant uses the limitations “first stability ratio,” “second stability ration,” and “third stability ratio” in the claims. The claims themselves do not provide a clear definition for these terms. Words of the claim must be given their plain meaning unless applicant has provided a clear definition in the specification. *In re Zletz*, 893 F.2d 319, 321, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989); see also MPEP § 2111.01. The Specification at [0023] discloses, “The stability of a bearing may be gauged by the radial stiffness divided by the cross coupled stiffness (stability ratio).” The terms “radial stiffness 320 (k_{xx})” and “cross-coupled stiffness 325 (k_{xy})” are discussed in some detailed at [0024]. Accordingly, the “stability ratio” limitations will be construed as and limited to the definition provided by Applicant in the Specification at [0023].

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
